INFORMATION

The information consolidated into this Parts List includes the following:

Part name.

Model application.

Effective points of changes by car serial number, engine number or body number.

Part number.

Quantity used per car—one used per car except as indicated by (X).

Special notes necessary for proper identification of parts.

Parts peculiar to right hand drive cars are indicated by (R.H.D.)

Parts not previously used on Dodge passenger cars are designated by a double box symbol (x) preceding the part number.

Changes in part number are designated by a pound symbol (#) preceding the part number.

If a part number has been cancelled or superseded by another number it will be indicated thusly—#345497.

ARRANGEMENT

Each major group is divided into sub-groups which are numbered and lettered. The numbers used on the sub-groups are the same as the numbers of their respective major groups. The letters on the sub-groups are in alphabetical sequence in the major groups—for example:

Major Group No. 9 has sub-groups 9-A, 9-B, 9-C, etc.

Attaching parts such as bolts, nuts, studs, etc., can easily be identified as in most cases they follow the part or parts with which they are used and are shown indented from the margin.

ILLUSTRATIONS

Illustrations are included at the beginning of each major group. The correct names for parts in the illustrations are shown below or on the back of the picture and are keyed to the picture by reference numbers. Immediately following the part names will be found the number of the parts list sub-group in which the part is listed. Also, immediately under the sub-group headings will be found the illustration plate numbers containing pictures of the parts in the sub-group.

An index of illustration plate numbers will be found immediately preceding the alphabetical index.

PAGE NUMBERING

To facilitate locating parts, all pages are numbered in consecutive order by major groups, the page number showing first the major group number followed by the number of the page in the group—for example:

Page 9—3, 9—4, 9—5, indicate: Group 9, page 3; Group 9, page 4; Group 9, page 5.

ALPHABETICAL INDEX

Quick reference to any part by name is provided in the alphabetical index. This index shows the number of the sub-group in which the parts are listed.

NUMERICAL INDEX

Reference to any part number is provided in the numerical index. This index lists all parts in numerical sequence and shows the sub-group in which each part number is listed, except numbers between 100,000 and 200,000 (Standard Parts); the listing of these will be found in Group 18 of The Dodge Brothers Passenger Car Master Parts List, Final Edition, June 15, 1934. The numerical index does not show their location elsewhere.

HOW TO ORDER PARTS BY MAIL

Service parts should be ordered on the standard Form (No.3671-A) which is furnished upon request by the Chrysler Motors Parts Corporation of Canada, Limited, Windsor, Ont. The proper use of this form is described in "Parts Merchandising Plan".

Direct Dealers east of Port Arthur, must send their parts orders to the Chrysler Motors Parts Corporation of Canada, Limited, at Windsor, Ont., and those from Port Arthur, Ont., west, must send their parts orders to Chrysler Motors Parts Corporation of Canada, Limited, at Regina, Sask.

Associate Dealers, and Service Stations in Canada must send their orders to the Dealer under whom they operate, who will either fill the order from his own stock or forward the order, properly executed to the Chrysler Motors Parts Corporation of Canada, Limited.

Orders for parts which require special Construction for a particular car, or special matching to a sample, should always show the car serial number, and should be sent to the Windsor plant.

When ordering parts to be painted to duplicate the original factory color, the car serial number must be specified on the parts order.

When ordering trim material, a sample of the material which is to be matched should be included with the order if possible. In all cases the car serial number must be given.

All Dodge body parts should be ordered from the Chrysler Motors Parts Corporation of Canada, Limited.

HOW TO ORDER PARTS BY TELEGRAPHIC CODE

To simplify ordering service parts by telegraph, and to facilitate decoding these orders, the Standard code of "DAY OR NIGHT" has been adopted.

The "DAY OR NIGHT" code is translated as follows:

D	A	Y	O	R	N	I	G	H	T
1	2	3	4	5	6	7	8	9	0

The following utility code is for use in giving shipping instructions or making inquiries concerning parts orders by telegram.

CAKUN	Ship to us by fastest transportation.
CALIP	Ship by express to
CALOR	When and how did (or will you) ship our order number (or order of)
CALUS	Cancel order for parts, our telegram of
CAMAU	Cancel order for parts, our letter of
CAMEV	Cancel order for parts, number
CAMIW	ADD to our order of (or number)

A sample "coded" telegram is given below as an example:

Chrysler Motors Parts Corporation of Canada, Limited, Windsor, Ont.

CAKUN SIX EACH OANRA, DTYGAY, YDGHRD

Blank Motor Co.,
Doeville, Ont.

When the above telegram is decoded it will be as follows:

Ship to us by fastest transportation

6-Front Axle "I" beam bushing, lower-42652

6-Front Axle "I" beam plug -103893

6-Steering knuckle arm, right -318951

All telegraphic orders should be confirmed by mail on the Standard Parts Order form, making specific reference to the telegram.

AUXILIARY EQUIPMENT

The units listed below, together with their component parts, are sold only by their respective manufacturers or their authorized service stations. All orders for these units or parts must be sent to the companies as directed in the list below. To insure against delay in shipment DO NOT send these orders to the Chrysler Motors Parts Corporation.

Group 1-AD—BATTERY RECHARGER

Will save its cost many times over by increasing battery life and eliminating troublesome and expensive battery replacements. Charging rate in excess of four amperes, no tubes or liquids--plugs directly into socket on car dash--practically no installation expense--built especially for Dodge Motors dealers--fully guaranteed.

Battery re-charger--60 cycle		630546
Battery re-charger--25 cycle		630547

Group 1-AE—TOP WATERPROOF PRESERVER

For water proofing all kinds of fabrics, available in black for closed cars, clear for soft top materials used on convertible models, keeps fabrics soft and pliable, restores original luster to top material. Does not form a glazed or "varnished" looking finish.

Group 1-AH—TIRE PRESSURE GAUGE

Accurate tire pressures are essential to the long life of low pressure air wheel tires. This gauge is an air pressure gauge. Unless an owner has easy access to an accurate low pressure gauge he should purchase one of these gauges.

Tire pressure gauge	DT,DR	x395382

Group 1-AI—TRUNK

Custom built form fitting trunks, extra heavy, all metal construction. Bonderized, water proof and dust free, available for both five wheel and six wheel equipment cars. Exclusive to Dodge Motors dealers.

Standard for use on cars equipped with trunk racks. All metal construction. Top opening.

Group 1-AL—RUBBER CEMENT

Not just a "rubber" cement, especially prepared for permanently cementing rubber and fabric materials to metal--excellent for cementing rubber weather strips to doors--mats to running boards--deadening material to metal panels, etc. A practical time saving utility cement.

Rubber cement (1 pt. cans)		624878
Rubber cement (1 gal. cans)		630508

Group 1-AM—BODY SEALING COMPOUND

A non-drying sealing compound for sealing cracks in tops, body joints and all places where a flexible waterproof seal is required. Will withstand extreme pressures, heat and cold, absolutely waterproof. An ideal general utility sealing compound.

Sealing compound (1 pt. tin)		630512

Group 1-AN—RADIATOR HOSE

In order to give satisfactory service, radiator hose must be up to engineering specifications just the same as other parts of the car. This radiator hose is made to Dodge specifications. It is priced at prices made possible only by the tremendous purchasing power of Dodge motors.

Group 9-A—POWER PLANT, ENGINE ASSEMBLY AND PARTIAL ENGINE ASSEMBLY

NOTE: The following symbols are used in connection with engine numbers.

Engine numbers without symbols indicate standard cylinders and crankshaft bearings.

The letter "A" immediately prefixing the engine number indicates cylinder bore .020" (.508mm.) larger than standard.

The letter"B" immediately prefixing the engine number indicates main and connecting rod bearings .010" (.254 mm.) smaller than standard.

The letters "AB" immediately prefixing the engine number indicate cylinder bore .020" (.508 mm.) larger than standard, the main and connecting rod bearings.010"(.254 mm.) smaller than standard.

The letters in the circular pads at either end of the engine number pad are for the use of factory inspectors only and should not be connected with the engine number.

NOTE: A power plant assembly (complete) includes engine, clutch and transmission assemblies (complete) including electrical equipment, carburetor and fuel pump.
